PROJECT

Title : BUS TRACKING

Our bus tracking system is designed to assist users in understanding bus timings and providing live tracking. This helps users find their nearest main bus stops, select routes, and determine stops for their chosen bus (including time for each stop). Buses can be filtered based on limited or ordinary routes, specific times, or destinations. Additionally, the system offers live tracking, updating users about traffic incidents and other concerns. This emphasizes the significance of using a real-time bus tracker to ensure passenger safety consistently

INTERNSHIP

Pursuing internship in Frontend from Bridgeon

EDUCATION & CERTIFICATIONS

Graduation : BSc Computer Science from LBS Model Degree College , Parappanangadi under University Of Calicut (2021-24)
